Welcome to Greiner Bio-One Preanalytics

Your partner for innovative preanalytical
specimen collection systems and safety solutions

There are more than six million people on the earth today. As different as they all may be, they share one desire; the desire for a long, healthy and safe life.

We know that we can make a significant contribution towards safety and health in the area of medicine. We use our ideas and our competence for new product solutions. This is our contribution to increased efficiency and safety in preanalytics, which in turn has a positive effect on the reliability of analysis results.

As technological leader in the field of sample collection using products made out of plastic, Greiner Bio-One provides custom-made solutions conforming to the highest of quality standards.

The **VACUETTE®** product line, manufactured by Greiner Bio-One and sold in more than 100 countries throughout the world, is used in hospitals, laboratories, doctors' offices and blood donor centres. We are a global player because medicine knows no bounds.

When dangerous infectious diseases occur due to changing living conditions, they make the headlines and the importance of our work is highlighted; since one of the most fundamental human needs, has always been to maintain vitality and joy for life, it has always been high priority.

Greiner Bio-One
Your Power for Health

VACUETTE® one step ahead

Good reasons why you should not be satisfied with other solutions, when you can have the ORIGINAL:

Why is it important to use the best products at the best possible price performance ratio?

- Because your work is an important service to people entrusted to your care.
- Because correct analysis results are the basis for far-reaching decisions.
- Because only fully perfected products can guarantee safety and continually high quality.
- Because more efficiency lessens your burden with routine procedures.

Provide safety

Due to technical advances in the mid-eighties, Greiner was able to be the first company in the world to successfully launch a blood collection system made out of virtually unbreakable PET plastic including a safety cap. Against the background of the worldwide increase in infectious diseases such as HIV and hepatitis, health protection of medical staff has become a theme rapidly increasing in importance. The **VACUETTE®** blood collection system is a trend-setter. Many components of the **VACUETTE®** system have often been copied unsuccessfully, never reaching our high standards of quality.

Providing support

VACUETTE® products are the result of planned research and development in close co-operation with our partners and customers. Greiner Bio-One offers comprehensive additional services all around the product by providing expert support and technical support and training when a hospital or laboratory converts to the **VACUETTE®** blood collection system. A further specific focus of the company is the continuity of customer care, achieved by employing well-trained experienced sales representatives. Well-prepared support and education materials make the daily work with **VACUETTE®** products simple and safe.

Increase efficiency

Streamlining of procedures on the ward and in the laboratory is a theme that continues to increase in importance. **VACUETTE®** products can help save time for routine activities. Whether with the aid of high capacity instruments for de-capping blood collection tubes or pre-barcoded blood collection tubes, Greiner Bio-One is investing in new product solutions that can significantly increase efficiency.

Superior competence

Innovation is the basis of all progress. The company history of Greiner Bio-One Preanalytics began with a ground-breaking innovation and this is still the central element of all company activities. In order to guarantee that the level of quality remains constantly high, products must be technically perfect and subject to continual improvements. Expertise in production technology makes it possible to manufacture special thick-walled evacuated tubes, distinguished by increased shelf life.

Save costs

Greiner Bio-One is the specialist when it comes to realising customers' individual requirements. There are no long lead times. The "flat" hierarchy means that decisions can be made quickly, and delays avoided when it comes to handling the orders. Greiner Bio-One Preanalytics is specialised in the manufacture of user-friendly, safe specimen collection systems. This focus means that the customer can be sure of getting products to the best possible cost-performance ratio.

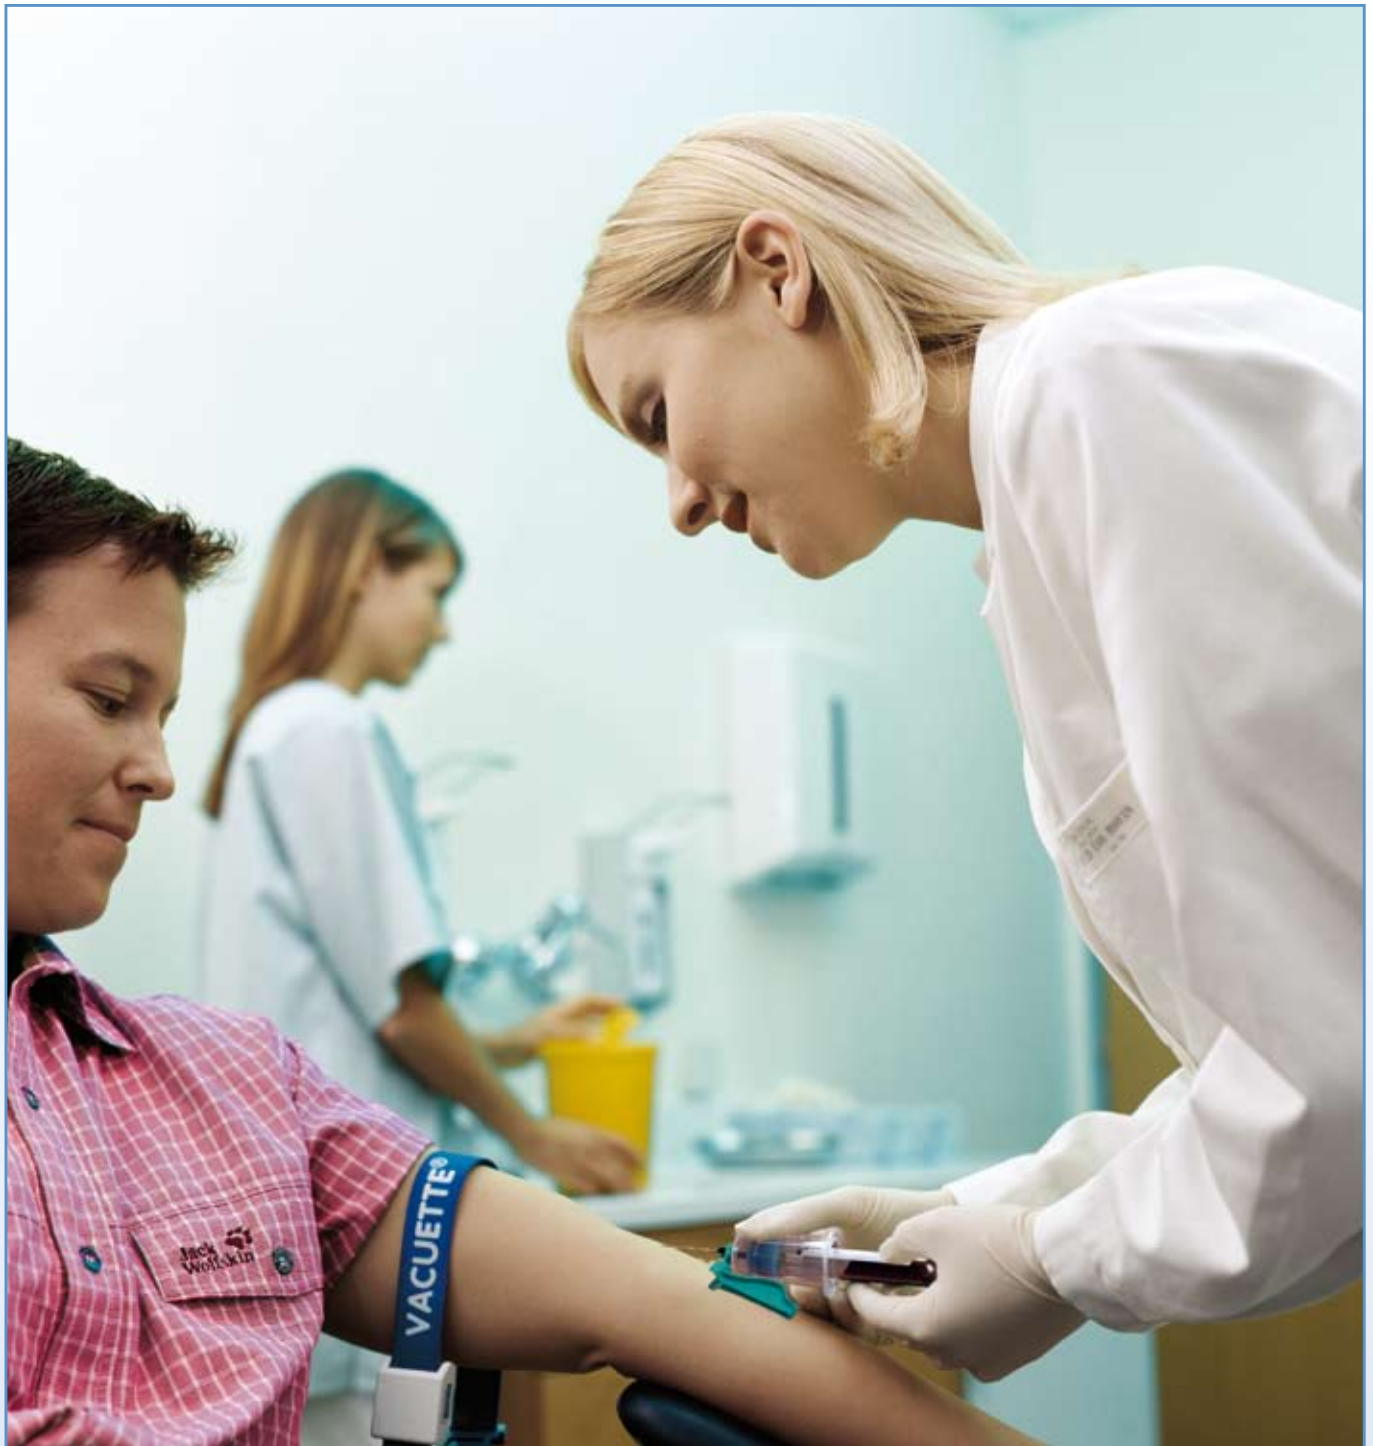

The VACUETTE® System

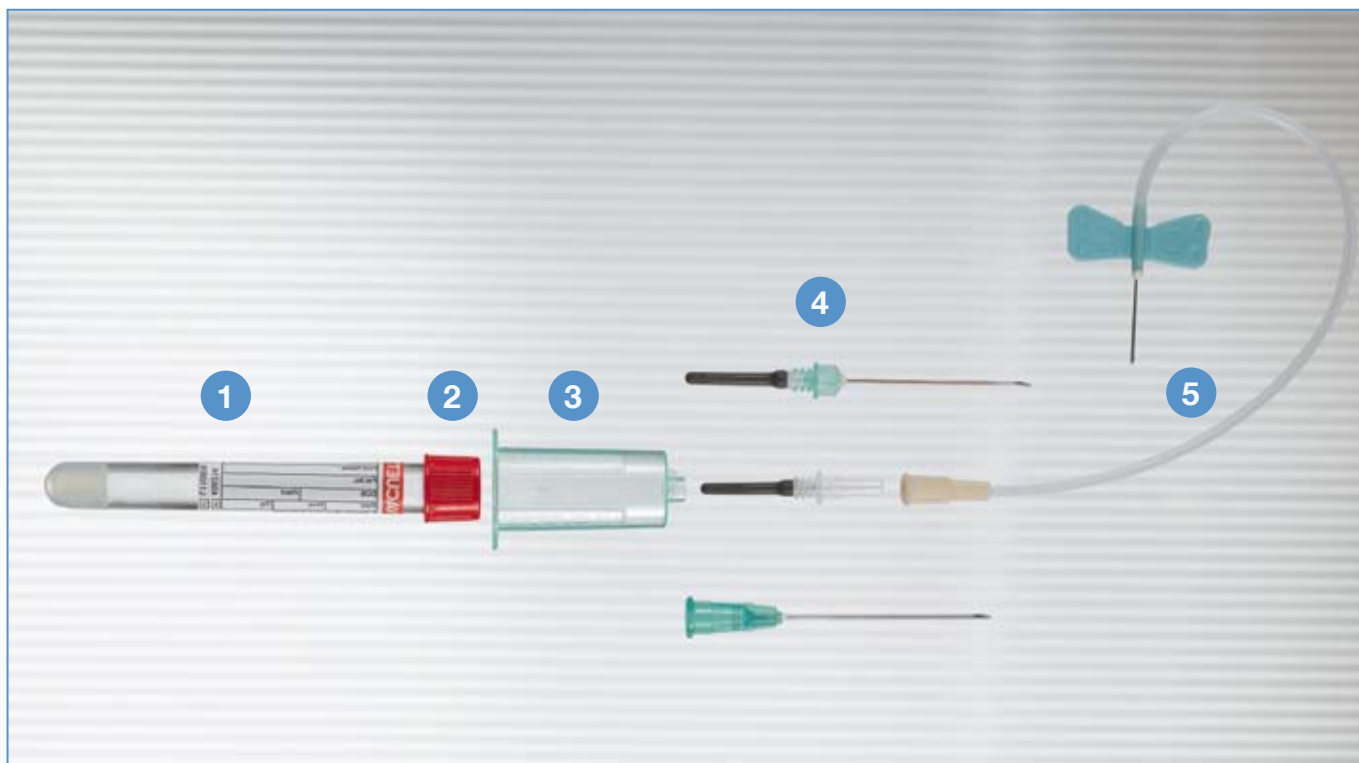

Functionality for simple handling

The main advantage of a user-friendly evacuated specimen collection system with pre-measured vacuum is that a clearly defined quantity of blood or urine can be collected without further handling requirements.

VACUETTE® tubes can be changed quickly and hygienically, without any risk of coming into contact with specimen material. By using **VACUETTE®** Safety Products, a needlestick injury can be effectively prevented.

All system components are ideally suited to one another.

Selected components of the **VACUETTE®** system:

- ① Sterile PREMIUM Tube made from PET
- ② Safety Twist Cap
- ③ Tube Holder (various versions available)

To choose between:

- ④ **VACUETTE®** Multiple Use Drawing Needle with safety valve or VISIO PLUS Needle with view window or Luer Adapter
- ⑤ Luer Adapter with Blood Collection Set

Additionally:

- ⑥ Tourniquet
- ⑦ Sharps disposal container

The VACUETTE® Product Range

The comprehensive product range consists of evacuated blood collection tubes for blood, saliva and urine collection, accessories, safety products for prevention of needlestick injuries, both manual and automated ESR systems (erythrocyte sedimentation rate), sharps disposal containers, transport containers and automatic instruments for decapping tubes.

The individual tubes contain additives for the stabilisation of samples. The caps of the tubes are coloured in accordance with the international recommended colour code, so that different tube types can be recognised at first glance. The different coloured rings on the top of the cap provide additional optical recognition.

Colour and meaning of the stabilisation ring

	Standard tube	Black Ring
	Tube with separation gel	Yellow Ring
	Tube with beads	Red Ring
	Paediatric tube	White Ring

More safety and efficiency with **VACUETTE®** closure systems

All tubes with 13mm diameter are available in two versions: with the PREMIUM Safety Twist Caps or with Non-Ridged pull-caps. The **VACUETTE®** PREMIUM Tube with Safety Twist Cap is especially suited for manual opening, whilst the **VACUETTE®** Non-Ridged tubes with pull-cap have been especially developed for use on automatic decapping instruments.

All tubes with 16mm diameter are only available with non-ridged pull-caps.

PREMIUM Tubes with Safety Twist Cap

Due to the optimal coordination between Safety Twist Cap and thread, the **VACUETTE®** PREMIUM tube can be opened with a simple twist movement, requiring minimal effort.

Due to the secure hold on the tube, there is no way that the cap can become unfastened by itself. This is a particular advantage during transport.

Non-Ridged Tubes with Pull Cap

Without thread, the tubes are especially suitable when the tubes have to be automatically decapped with a quick pull movement.

- 1 For easy optical differentiation, the **VACUETTE®** PREMIUM tubes have a solid coloured tube cap.
- 2 The **VACUETTE®** Non-Ridged tubes have translucent coloured tube caps.

VACUETTE® Blood Collection Tubes

The innovative **VACUETTE®** Blood Collection Tubes made out of virtually unbreakable PET plastic have set the standard on today's market. They provide improved safety and hygiene during specimen collection procedures with the advantage of being clear as glass.

Most **VACUETTE®** Blood Collection Tubes contain chemical additives, which in combination with the pre-determined vacuum guarantee the correct mixing ratio for the blood sample. Reliable results and simple application make **VACUETTE®** the primary vessel for all current analysers. All the tubes have the CE-mark and most are US FDA cleared.

Coagulation sodium citrate / CTAD

Coagulation and CTAD tubes are used for examination of coagulation parameters. Coagulation tubes contain a buffered sodium citrate solution. It is available with a citrate concentration of 0.109 mol/l (3.2%) or 0.129 mol/l (3.8%). The mixing ratio is: 1 part citrate solution to 9 parts blood. In addition to buffered sodium citrate, CTAD tubes contain theophylline, adenosine and dipyridamol.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

Serum

The inner wall of the serum tube is specially coated with microscopic silica particles, which activate the coagulation process. Serum separator tubes contain a separation gel in the base of the tube; during centrifugation, this gel forms a stable barrier between the serum and the blood cells. In the primary tube and under recommended laboratory conditions, certain parameters remain stable for up to 48 hours.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

Heparin

The inner wall of the tube is coated with spray-dried lithium, sodium, ammonium or heparin. These additives are anti-coagulants, which activate anti-thrombins, thus blocking the coagulation cascade of the blood specimen. LH Lithium Heparin Tubes are also available with a separator gel.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

EDTA

EDTA tubes are for the examination of whole blood in haematology. Are offered as either K2EDTA or K3EDTA tubes. EDTA binds the calcium ions and therefore blocks the coagulation cascade. Erythrocytes, leucocytes and thrombocytes in an EDTA anticoagulated blood sample are stable for up to 24 hours.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

455001	9ml	white	black	16 x 100	Z No Additive

Discard Tubes

The **VACUETTE®** Discard Tube is not for analysis. The tube interior contains no additive.

When using a winged butterfly set to draw a coagulation sample, a discard tube should be taken first. This will prime the line and therefore the coagulation tube will not be underfilled.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

* Information on ESR readers and accessories can be found on page 44.

Homocysteine

Homocysteine occurs in cell metabolism as an intermediary product during the catabolisation of methionine. A higher concentration of homocysteine in the blood can increase the risk for cardio and cerebrovascular blockages. Determination of the homocysteine concentration in plasma is therefore carried out for primary prevention - and sometimes for secondary prevention - of heart attacks and strokes.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

Item No.	Nom. Vol.	Cap Colour	Ring Colour	Tube Size	Description
----------	-----------	------------	-------------	-----------	-------------

VACUETTE® Safety Products

In the healthcare sector, sharps injuries account for most work-related transmissions of infectious diseases, whereby needlestick injuries present by far the greatest risk. More than 50% of all registered cases concern nursing staff, followed by doctors and laboratory staff.

However, needlestick injuries need not be an occupational risk. By using **VACUETTE®** Safety Products, this danger can be virtually eliminated.

VACUETTE® Safety Products

Safety Tube Holders

The **VACUETTE®** QUICKSHIELD Safety Tube Holder with integrated protective shield is easy to use. The **VACUETTE®** TIPGUARD Safety Tube Holder with integrated spring mechanism provides comfort for safe blood sampling. Comfort and safety are the key features of the **VACUETTE®** TIPGUARD Safety Tube Holder. The spring safety mechanism is activated by pressing the two blue release triggers on the top of the holder whilst the needle is still in the vein. The needle is then automatically withdrawn back into the holder, ready for disposal with no risk of injury. The holder should only be used with **VACUETTE®** blood collection needles.

VACUETTE® Blood Collection Accessories / Medical Devices

Simple handling and safety are of the highest importance during daily routine procedures. The requirements of the user are therefore the prime consideration during development of **VACUETTE®** Blood Collection Accessories. This led to development of products like the **HOLDEX®** Single-Use Holder, which was designed especially for patients with difficult vein conditions.

The eccentric Luer nozzle of the **HOLDEX®** Single-Use Holder, positioned off-centre, guarantees the optimal angle for venipuncture.

Another product is the **VACUETTE®** Multiple Use Drawing Needle. The special cut of the needle and the smoothly ground tip ensure gentle penetration of the patient's vein. More details on **VACUETTE®** Blood Collection Accessories can be found on the following pages.

Blood Collection Needles

Blood Collection Needles are predominantly used in routine blood collection and are exclusively single-use. The colour of the needle protective cap simplifies visual recognition of the individual needle gauges. For example, yellow symbolises the needle dimension 20 G (0.90 mm), green 21 G (0.80 mm) and black 22 G (0.70 mm). Blood Collection Needles are supplied in two lengths: 1" and 1 1/2" (25 mm and 38 mm).

VACUETTE® VISIO PLUS Needles

The **VACUETTE®** VISIO PLUS Needle with optical venipuncture control can make an important contribution to simplifying blood collection routine for phlebotomists. The needle has a transparent plastic hub, which functions as a view window. If venipuncture is successful, the view window is coloured red due to the blood flow.

Decappers

Depending on the type of instrument the **VACUETTE®** UNICAP Decappers open **VACUETTE®** Blood Collection Tubes quickly and safely, either directly in the analyser rack or after placing tubes in adapters of the decapping belt. The time consuming process of sorting out various tube types prior to decapping is no longer necessary, as the UNICAP instruments can open different tube types in one working step.

Item No.	Description	Packaging

Accessories Transport Line

Carrier bags are suitable for convenient transport of one or several **VACUETTE®** transport boxes or containers. The transport bags consist of isothermal material and are thus equally suitable for keeping samples cool. Separate pocket slot for transport documents and cool pack. The ThermoScan Temperature Monitoring Unit can be used all over the world, wherever it is necessary to monitor the temperature over a longer period of time with a calibrated instrument.

MiniCollect® Capillary Blood Collection System

The **MiniCollect®** product line is a functional capillary blood collection system, which has been especially developed for children and neonates. Our innovative design guarantees high functionality and flexibility during use.

The unique construction of the closure cap enables the user to collect a blood sample without having to open the tube, saving time and ensuring increased safety.

Capillary Blood Collection System (Accessories)

The blood collection capillary and funnel are used for simplifying blood transfer from the puncture site to the **MiniCollect®** tube. Due to the relative small size of **MiniCollect®** tubes, a special carrier tube was designed. The carrier tubes ensure compatibility of the system with most common centrifuge and laboratory instruments. The new Safety Lancets ensure consistent puncture depth for straightforward sample collection.

VACUETTE® Automatic and Manual ESR Systems and Accessories

The safe and reliable ESR readers are distinguished by their simple handling. They are fully automated and can be used in the ward, the doctor's office or in a laboratory. The readers work using infrared-sensors, which in contrast to visual methods guarantee improved reproducibility of results.

The erythrocyte sedimentation rate (ESR) is measured in an enclosed system, ensuring that the user does not come into contact with patients' blood. All ESR-readers are equipped with "permanent access". This means that tubes can be inserted into the measuring channels randomly and at any time, since each tube is analysed independently.

VACUETTE® Automatic and Manual ESR Systems and Accessories

4NC ESR sodium citrate 3.2%, PP	47

Automatic ESR System and Accessories

Three different size models of ESR instruments are offered. Readers with 100 channels are ideal for middle to large laboratories. The 20 and the 10 channel readers were designed for small laboratories or doctors' offices. All **VACUETTE®** ESR instruments operate in accordance to the Westergren method.

Item No.	Description	Packaging

Manual ESR System and Accessories

Two versions of the **VACUETTE®** Manual ESR System are available. The open sedimentation system consists of an ESR Tube made of PET plastic, ESR Pipette with graduated adapter and ESR Rack with graduation. The closed system consists of an ESR rack with graduation and a special ESR Glass Tube having either a 2.9 or 1.6 ml volume, alternatively the new ESR PP tube.

VACUETTE® Urine Collection System

Urine, like blood, is a potentially infectious sample material. The **VACUETTE®** Urine System enables a closed, sterile urine collection that in turn will improve the sample quality and guarantee the efficiency of the testing procedure. Tubes are available with or without preservatives.

The preservative helps stabilise the sample, which is important when the sample cannot be analysed within 2 hours of collection. Tubes can be ordered with either a round base or a conical base. Round-based tubes are used for chemical urine tests, whilst tubes with a conical base are used for microscopic examinations of urine sedimentation.

VACUETTE® Urine Tubes

VACUETTE® Urine Tubes are used as collection, transportation and/or analysis vessels. The **VACUETTE®** Urine Tubes are sterile, leak-proof and virtually unbreakable. They are available as round or conical based. Furthermore, they are offered with or without preservative. Tubes with preservative should be inverted 6-8 times following collection in order to achieve homogenous mixing.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

Greiner Bio-One Saliva Collection and Quantification System

The easy collection method and permanent availability make saliva an interesting alternative to other specimen materials such as urine or blood. Saliva is particularly suitable, if samples are required quickly, efficiently and non-invasively. On the basis of a liquid saliva extraction solution, Greiner Bio-One has developed a collection and quantification system, that is suitable for a broad range of applications, ranging from therapeutic drug monitoring to hormone analytics to drug screening.

Greiner Bio-One Saliva Collection System - Self-testing

The system consists of various components. A mouth rinsing solution to wash out the mouth cavity, a saliva extraction solution for the collection, a collection beaker and two evacuated tubes for the laboratory tests.

Self-testing means that the test person can do the saliva collection his/herself without the assistance of any medical personnel. The system as well as the corresponding instructions for use is tested and certified for self-testing.

Item No.	Description	Packaging

Labelling of VACUETTE® Products

The table below provides an overview of the symbols used on our labelling, with an explanation.

Symbol	Description
	Symbol for "Single Use"
	Symbol for "Use By"
	Symbol for "LOT Number (Batch Code)"
	Symbol for "Reference Number"
	Symbol for "Date of Manufacture"
	Symbol for "Manufacturer"
	Symbol for "Sterilized Using Ethylene Oxide"
	Symbol for "Sterilized Using Irradiation"
	CE Mark
	Symbol for "In Vitro Diagnostic Medical Device"
	Symbol for "Refer to Instructions for Use"
	Symbol for "Temperature Tolerance Range"

Letter code	Additive
Z	None / Clot Activator
LH	Lithium Heparin
NH	Sodium Heparin
AH	Ammonium Heparin
K2E	EDTA Dipotassium Salt
K3E	EDTA Tripotassium Salt
9NC	Coagulation Trisodium Citrate 9:1
4NC	Coagulation Trisodium Citrate 4:1
FX	Sodium Fluoride / Potassium Oxalate
FE	Sodium Fluoride / EDTA
FH	Sodium Fluoride / Heparin

Products with Highest Demands in Quality

Quality Standards

Product quality is of highest priority for Greiner Bio-One and to be sure of this, a thorough and multi-level quality management system has been developed.

Highly qualified and well-trained employees put the quality standards into practice. High-tech production technology as well as first-rate control and inspection devices ensure the highest quality standards.

Greiner Bio-One is certified according to ISO 9001:2008 and EN ISO 13485:2003-2007.

The products also bear the CE mark.

Furthermore, every item that is produced or distributed in the United States is cleared by the F.D.A., the U.S. Food and Drug Administration.

Quality Control

Quality controls and inspections are carried out by the quality control department as well as production personnel in the form of in-process checks. To ensure that these checks are carried out professionally, staff are trained regularly. The process consists of several steps:

- **Incoming goods inspections**
- **In-process production controls**
- **Laboratory testing**
- **Sterility controls**
- **Final product inspections**
- **Final inspection prior to dispatch**

Sterilisation

Sterilisation is carried out according to the latest standard of technology. Accelerated electron rays permeate the packaged products, killing off microorganisms completely. Sterilisation by electron rays is a validated and certified procedure. The process is extremely reliable, does not affect the product and does not leave any residue. To certify that a product has been through the sterilisation process, an orange indicator mark is printed on the label of the outer carton, which will turn into red after the sterilisation process has been completed.

Education and Training Material

To support our customers, we have a broad range of education and training material for sample collection with **VACUETTE®** products.

- 1 980131 **MiniCollect®** Skin Puncture Manual
- 2 980056 **VACUETTE®** Hygiene Compendium
- 3 980063 **VACUETTE®** Blood Collection Techniques Booklet
- 4 980102 **VACUETTE®** Handling Recommendations for Blood Collection Booklet
- 5 980124 **VACUETTE®** Safety Brochure
- 6 980183 **VACUETTE®** Preanalytics Manual

Production Locations

One of Greiner Bio-One's core competences is innovation. Over the course of the years, the company has become established as leader for knowledge and expertise, consistently building on this reputation. The production techniques are constantly subject to optimisation in cooperation with qualified partner companies, ensuring that Greiner Bio-One remains worldwide technology leader in this segment. Greiner Bio-One products are manufactured at high-tech production facilities to the highest quality standards in six locations on four continents, providing short delivery times all over the world.

The headquarters of Greiner Bio-One International AG are in Kremsmünster, Austria, where **VACUETTE®** blood collection tubes, urine tubes, tube holder and accessories for specimen collection are manufactured.

Greiner Bio-One North America Inc.

In order to supply the North American market directly, a production location was built in Monroe, North Carolina. Here, more than 100 highly trained employees manufacture **VACUETTE®** products to the usual exceptional standard.

Greiner Bio-One Brazil

For distribution on the South American market, a production facility was built in Americana, Brazil, in 2004 for the manufacture of **VACUETTE®** blood collection tubes.

Greiner Bio-One Kft, Hungary

The third production facility is located in Mosonmagyaróvár, Hungary. Accessories for blood and urine collection are manufactured here.

Greiner Bio-One Thailand Ltd.

In the near future, Asia will be supplied from our new production location in Amata Nakorn, Thailand.

Greiner Bio-One GmbH, Rainbach

In spring 2009 an extremely modern clean room production facility for **VACUETTE®** safety products was opened in Rainbach, Austria.

Disposal

Today the disposal of medical waste is gaining more and more importance in hospitals and laboratories.

VACUETTE® Blood Collection Tubes made from PET plastic can be disposed of in a regular incineration facility, which results in almost wastefree incineration. The residue is reduced to the natural components, carbon, water and oxygen. Via thermal recycling, the energy produced can be utilized beneficially. The energy value of 1kg plastic is equivalent to that of 1 litre fuel oil.

476083	LH Lithium Heparin Sep, 5ml, green/yellow, 13x100, transparent label, PREMIUM	Blood Collection Tubes	17
476084	LH Lithium Heparin, 6ml, green/black, 13x100, transparent label, PREMIUM	Blood Collection Tubes	16
476092	Z Serum Clot Activator, 6ml, red/black, 13x100, transparent label, PREMIUM	Blood Collection Tubes	15
724300	Urine Beaker with Safety Stopper, 100ml, sterile	Urine Collection System	51
724310	Urine Beaker with integrated Transfer Device, 100ml, sterile	Urine Collection System	51
724315	24 Hour Urine Collection Container, 2.7 litre, brown	Urine Collection System	51
724320	Urine Beaker, yellow lid, with Ring Screw Cap, 100ml, sterile	Urine Collection System	51
727111	ESR Pipette with adapter graduated, 200mm, für 454073	Manual ESR System	47
729073	4NC ESR sodium citrate 3.2%, PP, 1.5ml, black, 9x120, closed system	Blood Collection Tubes	22/47
729090	4NC ESR sodium citrate 3.2%, glass, 2.9ml, black, 9x120, closed system	Blood Collection Tubes	22/47
729093	4NC ESR sodium citrate 3.2%, glass, 1.6ml, black, 9x120, closed system	Blood Collection Tubes	22/47
800101	Foam Insert for VACUETTE® Transport Container (VTC) for 12 Tubes	Accessories/Medical Devices	38
800105	VACUETTE® Transport Container (VTC) incl. Foam Inserts for 12 Tubes, incl. HK0259	Accessories/Medical Devices	38
800110	VACUETTE® Transport Container (VTC) incl. Foam Inserts for 12 Tubes, incl. HK0259	Accessories/Medical Devices	38
836072	ESR Rack without graduation for 454073	Manual ESR System	47
836075	ESR Rack with graduation for 729090	Manual ESR System	47
836077	ESR Rack with graduation for 729093	Manual ESR System	47
836283	Barcode scanner, for SRS 100/II and SRS 20/II	Automatic ESR System	46
836577	VACUETTE® Multi-Mixer for VACUETTE® Tubes	Automatic ESR System	46
836578	Rack for VACUETTE® 40-Pos. Multi-Mixer for 9mm VACUETTE® Tubes	Automatic ESR System	46
836579	Rack for VACUETTE® 40-Pos. Multi-Mixer for 13mm VACUETTE® Tubes	Automatic ESR System	46
836580	Sed Rate Screener 100/II (SRS 100/II) w. integrated printer (for 100 tubes)	Automatic ESR System	46
836582	Thermal printer, for SRT 10/II, SRS 20/II and SRS 100/II	Automatic ESR System	46
836585	Thermal paper roll for printer (836582) and integrated printers in 836580 & 836587	Automatic ESR System	46

Product Index

Item No.	Description	Chapter	Page
836586	Sed Rate Mixer (SRM) for 9mm	Automatic ESR System	46
836587	Sed Rate Screener 20/II (SRS 20/II) w. integrated printer (for 20 tubes)	Automatic ESR System	46
836588	Control Unit for SRS 100/II, SRS 20/II and SRT 10/II	Automatic ESR System	46
836592	Sed Rate Timer 10/II (SRT 10/II) (for 10 tubes)	Automatic ESR System	46
836596	Sed Rate Mixer (SRM) for 9mm/13mm	Automatic ESR System	46
836597	Sed Rate Mixer (SRM) for 13mm	Automatic ESR System	46
840050	VACUETTE® Tourniquet, latex free	Accessories/Medical Devices	36
840051	VACUETTE® Tourniquet for children, latex free	Accessories/Medical Devices	25/36
840053	VACUETTE® Disposable Tourniquet, latex free	Accessories/Medical Devices	36
840054	SAINT Disposable Tourniquet, latex free	Accessories/Medical Devices	36
855900	VACUETTE® UNICAP Decapper for Roche / Hitachi Racks	Accessories/Medical Devices	37
855901	VACUETTE® UNICAP Decapper for Tecan Racks	Accessories/Medical Devices	37
855902	VACUETTE® UNICAP Decapper for Bayer Advia Racks	Accessories/Medical Devices	37
855903	VACUETTE® UNICAP Decapper for Olympus Racks	Accessories/Medical Devices	37
855904	VACUETTE® UNICAP Decapper (with belt adapter for insertion of tubes)	Accessories/Medical Devices	37
855905	VACUETTE® UNICAP Decapper for Sysmex / Iris / Menarini	Accessories/Medical Devices	37
855907	VACUETTE® UNICAP Belt Adapter 100mm	Accessories/Medical Devices	37
855908	VACUETTE® UNICAP Belt Adapter 75mm	Accessories/Medical Devices	37
881010	GBO Saliva Quantification Kit	Saliva Collection System	55
881011	GBO Saliva Collection System, single packed	Saliva Collection System	54
881012	GBO Saliva Collection System, 50 pcs. bulk	Saliva Collection System	54
881111	GBO Rinsing Solution 6ml	Saliva Collection System	54
881112	GBO Saliva Extraction Solution 4ml	Saliva Collection System	54
881115	GBO Saliva Transfer Tube (4) 3.5ml	Saliva Collection System	54
881116	GBO Saliva Transfer Tube (5) 3.5ml	Saliva Collection System	54
881211	GBO Saliva Collection Beaker, with integrated transfer unit	Saliva Collection System	54
HE4723	Label "UN 3373"	Accessories/Medical Devices	39
HK0190	Transport carton for 1pc. VACUETTE® Transport Box (VTB)	Accessories/Medical Devices	38
HK0259	Transport carton for 1pc. VACUETTE® Transport Container (VTC)	Accessories/Medical Devices	38
